TUNING

Brass instruments are divided into 2 groups for tuning purposes.
Group 1 marked with ♯ stays in tune with Flute 1 and Group 1 of the string section. This group includes horns 1 & 3, trumpets 1 & 3 and trombones 1 & 3.

Group 2 marked with ♭ tunes approximately 1/6-1/4 tone lower than the Group 1. This group includes horns 2 & 4, trumpets 2 & 4 and trombones 2 & 4.

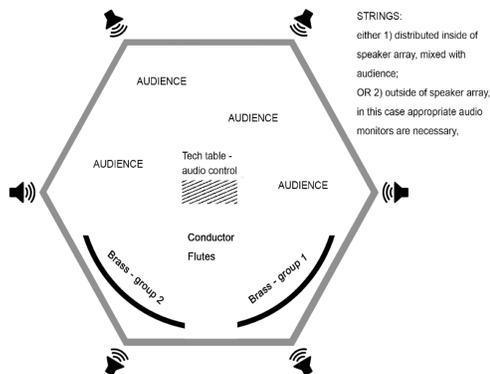

Microtonal notation:

- ♭ 1/4 tone lower (flat)
- ♯ 1/4 tone higher (sharp)
- ♯♯ 3/4 tone higher (sharp)

HORN 1 (Cor.1 in F)

HORNS

Notation is based on 'Extended Techniques For The Horn' by Douglas Hill, Studio 224, 1983.

◆ ◆ **half-valved sounds:** diamond-shaped noteheads indicate APPROXIMATE pitch

Change the pitch following the shape above a note, oscillating the fingers and subtly changing timbre. Treat each diamond-shaped note as an axis of pitch oscillation.

narrow-range pitch oscillation (1/4 - 1/6 - 1/8 tone)

wide-range pitch oscillation

Note: an alternate narrow range oscillation effect can be also achieved by valve tremolo (fast fingering change on a single pitch, giving an impression of a timbral change.)

"scoop-up"

finger the open note and attack from a lower covered pitch

"scoop-down"

attack the grace note with the fingering of the resultant stopped note
