TUNING

Brass instruments are divided into 2 groups for tuning purposes.

Group 1 marked with \flat stays in tune with Flute 1 and Group 1 of the string section. This group includes horns 1 & 3, trumpets 1 & 3 and trombones 1 & 3.

Group 2 marked with \sharp tunes approximately 1/6-1/4 tone lower than the Group 1. This group includes horns 2 & 4, trumpets 2 & 4 and trombones 2 & 4.

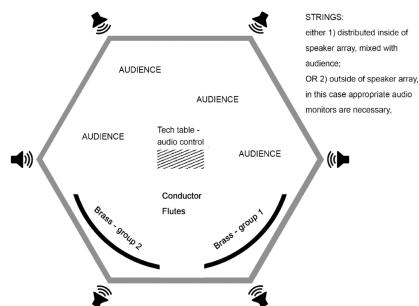

Microtonal notation:

\flat 1/4 tone lower (flat)

\sharp 1/4 tone higher (sharp)

$\#$ 3/4 tone higher (sharp)

HORN 3 (Cor.3 in F)

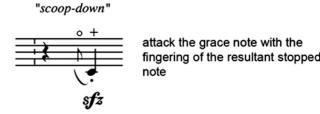

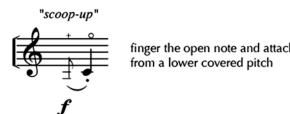

- ◆ **half-valved sounds:** diamond-shaped noteheads indicate APPROXIMATE pitch

Change the pitch following the shape above a note, oscillating the fingers and subtly changing timbre.
Treat each diamond-shaped note as an axis of pitch oscillation.

~~~~~ narrow-range pitch oscillation (1/4 - 1/6 - 1/8 tone)

-W- wide-range pitch oscillation

Note: an alternate narrow range oscillation effect can be also achieved by valve tremolo (fast fingering change on a single pitch, giving an impression of a timbral change.)

$\text{♩} = 100$
